

# Best Practice

## High-Tech Specifics – Technical Distribution

For its customer HP Inc., Gebrüder Weiss organized the planning, construction and pre-installation of the latest generation of digital presses for the corrugated packaging industry – with very special dimensions.

A pioneering spirit for success: thanks to the high degree of logistics and technical expertise of its business unit tectraxx, Gebrüder Weiss was able to arrange pre-installation for the customer in a very tight time frame – with an experienced international team and high-precision project management.

### Added value achieved for our customers:

- High-precision planning down to the smallest detail
- Project and resource management: coordination of the teams from GW, tectraxx as well as Teneso-Partner (NL)
- Organization of the logistics and assembly equipment required on site
- Rapid assembly with flexible handling
- Downstream logistics services: thanks to disposal of all transport and packaging materials, the equipment can be commissioned quickly

”

**Gebrüder Weiss  
and tetraxx provide  
expertise in the  
field of Technical  
Distribution unlike  
most supplier.**
