

GW direct.line

**GW direct.line:
Direct. Fast.
Individual.**

GW direct.line is the ideal part and full load system for your direct European transports. Thanks to our modern fleet, including our own vehicles and subcontractors, along with a dense network of dispatching locations, we bring your cargo to its destination in Europe punctually, safely, and via the most efficient route. For you, this means flexibility and planning security thanks to individually agreed durations and flexible departure times.

Our myGW customer portal also gives you access to numerous **digital services** that make your day-to-day work easier: from order management and shipment tracking including estimated time of arrival (ETA), to document management.

Partial and Full Loads

Product portfolio

Partial and Full Loads

LTL - Less Than Truckload

- Our load planning experts consolidate and optimize your partial loads and find a flexible and efficient solution that meets your needs.
- LTL includes shipments from 5 pallets, 2,000 kg, 2 loading meters or 10 cubic meters.
- Benefit from attractive transport rates and comprehensive service.
- For smaller shipments, we are happy to offer you extensive options in the GW pro.line product.

FTL - Full Truckload

- In addition to our LTL deliveries, our FTL product offers a direct route for your cargo to reach its destination.
- We are happy to organize full loads with the necessary truck equipment for you within Europe – directly, flexibly and without delays.
- Maximum efficiency, flexibility, and reliability for your transports.

Combined transport

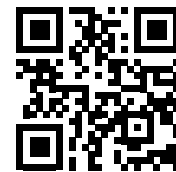

- Combined transport offers a more environmentally friendly alternative to pure road transport.
- Integrate alternative transport modes for predictable transit times and CO₂ reduction.
- Contribute to sustainability and ensure predictable and cost-effective delivery times.

Industry Solutions

- Take advantage of our customized industry solutions at select locations.
- Customized transport for high-tech, food, automotive, and more.
- Rely on the industry-specific know-how of our transport specialists.
