Gebrüder Weiss Rolls Out Full Truckload Services

Logistics company expands domestic transport services in the United States to create efficiencies for customers and provide more options for product delivery.

CHICAGO – November 23, 2021 - The international logistics company Gebrüder Weiss has expanded its customized domestic transport services in the United States to include Full Truckload (FTL) services. Less Than Truckload (LTL) solutions will continue to be offered in addition to FTL solutions. The expansion is another step in the freight forwarder's overall growth in the United States.

Prioritizing customer experience and satisfaction, Gebrüder Weiss's new solution includes customer access to a web-based Transportation Management System (TMS). This feature allows customers to enjoy access to seamless transparency, quoting, scheduling, and tracking of their products. Instant online pricing, featuring multiple carriers across the United States, Canada and Mexico, increases customers' access to competitive rates while saving them time.

"We are delighted to offer our customers FTL as part of our domestic transport services," said Kate Leatherbury, Director of Domestic Transportation Solutions at Gebrüder Weiss USA. "It's been wonderful to see customers experience cost and time-savings when so many businesses are struggling with supply chain disruptions," she added.

Through an advanced domestic TMS solution, customers can reduce costs and increase the speed and flexibility of their transport. In addition to optimizing loads and increasing automation for any FTL, LTL, and parcel shipping need, the new service from Gebrüder Weiss also includes auditing, freight payment, and customized reports.

"Manufacturers and consumer goods companies are navigating intense obstacles and we are doing what we can to help alleviate some of that stress by expanding services and helping our customers increase efficiencies," noted Mark McCullough, CEO of Gebrüder Weiss USA.
